A constant quest for perfection

Founded in 1755, Vacheron Constantin is the world's oldest watch manufacturer engaged in uninterrupted activity for more than 266 years, enriched by a heritage based on the transmission of watchmaking excellence and stylistic research across generations of Master artisans.

Bequeathed to posterity, François Constantin's words from July 5th 1819 clearly reveal the spirit that drives the Maison: "Do better if possible, and that is always possible."

From the first watch made in 1755 to today's mechanical creations, Vacheron Constantin watches have found their way through the ages, sharing the expectations and hopes of their customers, as well as perceiving the desire for change and aspiration towards beauty. La Belle Haute Horlogerie (beautiful high watchmaking) as envisioned by the Maison has been springing from the hands of the men and women in the Manufacture for more than 266 years.

Vast scientific culture

In keeping with the best traditions and consistently innovative, Vacheron Constantin mingles technical developments, aesthetic mastery, craftsmanship and passion. That is exactly how the Maison regards Haute Horlogerie: by refining its vision of time, by asserting its love of fine craftsmanship, by marrying heart and mind.

Inextricably bound up with progress achieved during the successive eras of its rich history, Vacheron Constantin is a veritable encyclopaedia of art, science and culture: it draws on its heritage to improve, reinvent and sublimate supremely precious wristwatches, pocket watches and table clocks.

The vitality of this legacy is based on a constant quest for technical quality, on the transmission of Haute Horlogerie and craftsmanship skills, on the aesthetic sophistication accumulated by generations of Master artisans. Vacheron Constantin's creations thus convey the Maison's signature high standards, inventiveness and elegance. Chosen as an emblem in 1880, the Maltese cross illustrates these values. This symbol is shaped like the eponymous watch component which was inseparable from the most refined 19th century movements and ensured the precision and longevity of timepieces. This message of high standards and durability is the very heart and spirit of Vacheron Constantin watches.

Sought-after by a clientele of insiders, Vacheron Constantin watches appeal to and win over generations of connoisseurs, collectors and aficionados who fall in love with their refined style, which embodies their taste for refinement, exclusivity and sobriety.

TECHNICAL EXCELLENCE AND EXPERTISE

Manufacture Vacheron Constantin has always been defined by its quest for excellence. This involves the transmission and valorisation of traditional craftsmanship skills, which have always been part of the rich history of watchmaking. It respectfully draws on its longstanding heritage in order to perpetuate and enrich the expertise accumulated over the course of its uninterrupted activity.

This technical heritage is also reflected in an aesthetic approach. Both are dedicated to creativity and innovation. They result in a simple and beautifully balanced expression of the art of watchmaking applied to the most complex creations.

Purity, refinement and elegance are the Maison's stylistic identity, defining its personality and guiding its fundamental choices. These attributes are expressed in a more ornamental way through its expertise in decorative arts techniques and skills such as setting, engraving, guilloché work and enamelling.

This mastery of watchmaking science and technology gives rise to traditional complications and new functions.

As notably demonstrated by the single piece edition Reference 57260, the most complicated watch ever made when presented in 2015 with its 57 complications; and the Traditionnelle Twin Beat perpetual calendar, the first dual-frequency watch.

From the tourbillon to the Grande Sonnerie, along with multiple combinations of astronomical indications, the creation of these complicated watches requires dexterity, know-how and flawless mastery. It is inseparable from the highest level of finishing and precision, certified by the Hallmark of Geneva.

LES CABINOTIERS

Exceptional to the point of uniqueness

Since the 18th century, Vacheron Constantin has perpetuated the tradition of cabinotiers, as the most learned watchmakers of the time were known. Accomplished men of culture and true scientists, they transformed their talent into timepieces in workshops bathed in light, called cabinets and located on the top floors of Geneva's buildings.

Masters of their professions and true scholars, they based their expertise on vast scientific knowledge and a curiosity for new ideas, nurtured by the philosophy of the Enlightenment. In their hands were born exceptional timepieces of rare technical and aesthetic complexity, inspired by astronomy, science and art, to which they paid tribute.

Vacheron Constantin continues to cultivate this Geneva tradition, embodying a permanent technical and creative challenge, within its Les Cabinotiers department. This is the birthplace of single piece edition models offered to collectors enamoured with excellence. It is the cradle of bespoke watches dreamed of by enlightened connoisseurs. Engineers, designers, watchmakers and Master artisans lavish their imagination, expertise and passion on bringing this supremely refined and exclusive practice of horology to life.

This approach is admirably epitomised in Reference 57260, the most complicated watch ever made, when presented in 2015 with its 57 horological complications, made to order by three Master watchmakers of the Manufacture in an eight-year development process.

MÉTIERS D'ART

A window on the world

Celebrating decorative techniques applied to watchmaking and jewellery, the watches composing the Métiers d'Art collection are inspired by Art, History and Culture. Beautifully enhanced by the Master craftsmen of the Manufacture, these authentic works of art testify to creativity that is open to the world, as well as to know-how passed down through generations. Here, the noblest craftsmanship finds an infinite scope of application. Precious stones, Grand Feu or plique-à-jour enamelling, gold sculptures or engraving as well as miniature paintings all depict an imaginary world constantly extended by Vacheron Constantin.

ONE OF NOT MANY.

Exclusivity as a vocation

Within the prestigious setting of Haute Horlogerie, Vacheron Constantin embodies virtuosity. It is a minority in its own community. A Maison of insiders and enlightened enthusiasts, an acknowledged expert in its field, it constantly seeks to excel. To embody this unique spirit and pay tribute to the exceptional character of its clientele and collectors, Vacheron Constantin has chosen to collaborate with talents whose personality and work express openness to the world, along with a spirit of innovation and creation. Visionary and passionate, they are recognised aesthetes in their own field, also reflecting the idea of being 'One of Not Many'. These human and artistic encounters follow naturally in the wake of those that have punctuated the history of the Maison.

TRADITIONNELLE

True elegance lies in the most subtle details

Imbued with history, the Traditionnelle collection highlights the breath of Vacheron Constantin's repertoire. Technical sophistication expressed through eminently horological codes, respect for aesthetic principles, a subtle sense of proportions: from the simplest to the most complicated, these timepieces pay tribute to the fine craftsmanship and expertise inherited from La Belle Haute Horlogerie.

ÉGÉRIE

Vacheron Constantin's horological muse

The Égérie collection weaves the encounter of two worlds, Haute Horlogerie and Haute Couture, under the prism of craftsmanship, precision, excellence and beauty. The refined style of the timepieces is subtly paired with the asymmetrical aesthetic faithfully perpetuating the Vacheron Constantin heritage. The pleated effect reminiscent of delicate fabric is draped with a mischievous touch reflecting today's women: inspiring, independent and charismatic.

MALTE

A matter of shape

Since 1912, the Manufacture has associated the emblematic curves of the Malte collection with the most prestigious watch mechanisms. Bearing the name of a watch component that became the Vacheron Constantin emblem, this collection comprises timepieces with appealing designs based on a unique interpretation of the barrel shape that provides a sophisticated setting for technical excellence.

HISTORIQUES

Vintage is the new "new"

In tribute to the uninterrupted creativity displayed by Vacheron Constantin since 1755, the Historiques collection offers reinterpretations of the most significant models from the Maison's heritage. Creations from all eras are revived in accordance with the aesthetic codes of their time, while meeting the standards of the present and exuding an inherent sense of timelessness.

HEURES CRÉATIVES

Sparks of creativity

Feminine designs that are never out of fashion, the pure light of diamonds, an interplay of style and grace... The Heures Créatives collection engages in a three-way dialogue with Art Nouveau, Art Deco and the 1970s. Each of these artistic periods finds its place on feminine wrists through the magic of jewellery craftsmanship, the brilliance of precious stones and the exquisite refinement of aesthetic designs.

LES COLLECTIONNEURS & RESTORATION SERVICE

The Heritage Department and the respective contributions of its market experts, archivists and watchmakers make it possible to assemble a range of original historical Vacheron Constantin watches within a single entity. The models in "Les Collectionneurs" range receive the most careful treatment in terms of restoration and certification before being offered to a discerning audience, complete with a new two-year guarantee. Vintage, yet restored to the most accurate state of operation enabled by modern technical progress, these watches bear witness to the rich heritage of the Maison.

In search of eternity

In the course of its more than 266 years history, Maison Vacheron Constantin has brought the world thousands of timepieces that live on and continue beating steadily, worn on a daily basis. These models of all ages and every possible level of sophistication require maintenance on a par with their pedigree. To ensure an enduring lifespan, they require regular servicing at the expert hands of specialists. The Manufacture's restoration department is a separate entity entirely dedicated to these delicate operations, ranging from standard cleaning to restoration of damaged historical model, as well as the exact reproduction of components that no longer exist today.

Based on exhaustive archives and a priceless stock of period components, these operations bring back to life, prolong the existence and perpetuate the pleasure of wearing these Vacheron Constantin pocket watches, wristwatches, clocks of various kinds as well as decorative objects that tell the time.

CALIBRES & COMPLICATIONS

The art of motion and beauty

Vacheron Constantin belongs to the select circle of Manufactures capable of crafting all the traditional horological complications. In addition to this mastery of the principles of Haute Horlogerie, it also demonstrates a keen sense of innovation and creativity. Driven by its own high demands and those of its most discerning customers, the Maison undertakes new technical developments, constantly rising to new mechanical and conceptual challenges. The application of rigorous reliability standards endow Vacheron Constantin calibres with a durability worthy of their more than 266 years history.

Perpetual minute and calendar repeaters, chronographs and tourbillons, astronomical function displays, to mention but a few... The repertoire of functions also extends to innovative complications, such as the gradual striking alarm of the Reference 57260 pocket watch and the variable-frequency escapement of the Traditionnelle Twin Beat perpetual calendar.

This mastery is also based on compliance with the highest standards of fine craftsmanship. Since 1901, Vacheron Constantin has been the most faithful representative of the Hallmark of Geneva. Established by a law promulgated by the Canton of Geneva, it is one of the oldest, most prestigious and most demanding Haute Horlogerie certifications. It singles out exceptional watches, designed and assembled in Geneva. It is awarded by an independent official body according to stringent criteria relating to case and movement components as well as the performance of the watch.
